PROFILE

Results-driven Frontend Developer with 3+ years of expertise in React, TypeScript, and modern web architectures. Passionate about crafting high-performance, accessible UIs that elevate user experiences. Adept at leading technical projects, mentoring teams, and translating Figma designs into scalable, maintainable codebases.

SKILLS

Frontend: React, Nextjs, Vue, Typescript, HTML5, CSS3, Tailwind CSS, Material UI, Ant Design UI, Shadcn, SASS, Figma

Backend: Node JS, RESTful APIs, Axios, Postman, JWT, Prisma, PostgreSQL

State Management: React Redux, Redux Toolkit

Build Tools: Webpack, NPM

Methodologies: Agile (Scrum)

WORK EXPERIENCE

Huawei Technologies

UI Designer | Software Engineer - Contract

01/2023 - Present

- Led the end-to-end design and development of a team shift management dashboard for employees, enabling managers to monitor work hours, assign shifts, and track attendance in real time — reducing scheduling conflicts through automation and agile iteration.
- Designed and implemented a Human Resource Management System (HRMS) dashboard using Vue.js and Huawei Cloud integration, replacing manual HR processes with automated workflows and speeding up manager approvals from days to hours.

- Developed real-time monitoring tools with JavaScript and automated email alert systems, enabling instant notifications to relevant teams when issues were detected — achieving near-perfect uptime and reducing resolution time from hours to minutes.
- Mentored junior developers, establishing coding standards, reusable component guidelines, and test coverage strategies for long-term scalability.

Technologies: Vue.js, Element Plus UI, Huawei Cloud integration (OWS), Tailwind CSS, SQL, JavaScript

Freelance

Frontend Developer

03/2021 - Present

- Developed a React/Next.js property listing platform with advanced search, map integration, and mobile-first design, resulting in higher lead conversions for the client.
- Built a secure, responsive booking system with JWT/OAuth authentication, payment integration, and real-time availability updates — launched with zero post-release security issues.
- Developed an automated talent acquisition form system that synced submissions to Google Sheets and sent instant email notifications to HR, eliminating manual data entry and accelerating candidate onboarding.

Technologies: React JS, Next JS, Tailwind CSS, Typescript, Prisma, JWT, PostgreSQL, Axios, REST Apis

Key Projects

- HR Management System Dashboard (HRMS) – Automated HR workflows and streamlined employee data management – Enabled secure, real-time travel reservations with payment integration.
- Flight/Hotel Booking Application – Allowed managers to track work hours, assign shifts, and monitor attendance.
- Team Shift Management Dashboard – Allowed managers to track work hours, assign shifts, and monitor attendance.
- Talent Acquisition website (Talentpoel) – Automated form submissions to Google Sheets and email alerts for HR teams.

Education

University of Benin

BEng Civil Engineering (2019)
