Anita Ifeoma Ikediashi

Frontend Developer

👤 Profile

With over 3 years of experience in React, I specialize in building dynamic, interactive user interfaces and responsive web applications. My approach emphasizes clean, maintainable code, ensuring seamless functionality and visually appealing designs across devices. Driven by a passion for user-centric innovation, I strive to continuously improve user experiences by integrating modern web technologies and best practices

💼 Employment History

UI Designer at Huawei Technologies, Lagos
August 2024 — Present

Created user-friendly and aesthetically pleasing interfaces for web applications, prioritizing responsive design, consistency, and user-centered principles to enhance the overall experience. Worked closely with development teams to ensure smooth integration and optimized performance, while consistently refining the design based on user feedback and testing.

Technical Team Lead at Huawei Technologies, Lagos
April 2024 — Present

- Directed cross-functional teams in executing complex technical projects, ensuring timely delivery, staying within budget, and maintaining high-quality standards, all while effectively managing risks and meeting stakeholder expectations.
- **Took ownership of solution delivery**, from identifying opportunities for automation to overseeing the deployment of cloud infrastructure.

Cloud Engineer at Huawei Technologies, Lagos
January 2022— Present

- Created and deployed custom scripts, dashboards, and tools using JavaScript, SQL, HTML, CSS, and Python to automate processes like ticketing and reporting, cutting manual labor and resource use by 20% for clients.
- Worked closely with cross-functional teams to identify automation opportunities, gather requirements, and deliver tailored solutions that met business objectives.
- Integrated advanced monitoring and logging tools into systems, enabling proactive issue detection and resolution to maintain operational stability and performance.
- Led the migration of web applications and infrastructure to cloud platforms such as OWS (Huawei Cloud), improving scalability and driving cost efficiency.

Key Projects

- **ISOC Operations Dashboard**: Designed a dashboard to track user

activity and ticket closures across shifts.

- **NSMC INC Dashboard**: Developed a dashboard for monitoring daily ticket status.
- **SHO Monitor**: Built a dashboard to track daily ticket counts, boosting performance by 30%.

Frontend Developer, Freelance
September 2022 — Present

- Developed and led the creation of 10+ responsive web applications, including housing, booking, and portfolio projects, using React, Next.js, and modern front-end frameworks to ensure seamless performance across devices.
- Optimized web performance using Chrome Developer Tools, implementing lazy loading, code splitting, and asset optimization to reduce load times and enhance responsiveness while ensuring accessibility compliance with ARIA roles and semantic HTML.
- Strengthened security by mitigating Cross-Site Scripting (XSS), CORS issues, and implementing secure authentication practices, while also integrating front-end applications with REST APIs using Axios for real-time data synchronization.
- Built scalable, modular UI components following modern frontend modularity principles, ensuring clear separation of concerns between UI and business logic to enhance maintainability and collaboration across teams.

Key Projects

- **Peter Ibeabuchi Portfolio**: Developed a professional portfolio for a data analyst.
- **Talentpoel Website**: Embedded Google Sheets in form pages, integrated YouTube player, and optimized images.
- **Deni Portfolio**: Built a portfolio for a product designer.
- **Real Estate Website**: Implemented admin dashboards and UI designs with Ant Design, and developed payment session pages.
- **Travel Booking Website**: Created a platform for booking hotels and flights.

💼 Internships

Field Engineer at Ministry of work and housing
June 2018 — November 2018

- Contributed to the design and construction of a 3-blocks flats project.
- Ensured compliance with all relevant guidelines, regulations, and safety standards, while making sure the project was completed within budget and on schedule.
